

# Course Description

Course number and section: VISA 256 001

Course Topic: **Photography II**

Instructor: Andreas Rutkauskas

## Course Description:

Building on skills and knowledge obtained in VISA 244, students enrolled in this class will be expected to refine their understanding of the workings and controls of a 35mm SLR film camera and apply it to digital applications (both in terms of shooting with a DSLR, as well as scanning film). In addition, students will further their research into the understanding of conceptual issues surrounding the study and production of photographic imagery.

Other: This course will concern itself with technical, aesthetic and conceptual aspects of photography. Further study of black & white darkroom technique, including exposure and processing controls will be pursued. More advanced or experimental techniques such as fiber-based printing, darkroom manipulations, and digital montage will be introduced as appropriate.
